HAHNEMANNIAN ADVOCATE

A MONTHLY MAGAZINE OF

HOMŒOPATHIC MEDICINE

AND ALLIED SCIENCES

H. W. PIERSON, M. D., EDITOR.

VOLUME XXXVII—JANUARY TO DECEMBER, 1898.

HAHNEMANN PUBLISHING CO.
CHICAGO.
1898.

A Pneumonia Case report from R.M. Barrows M.D., found in the XXXVII Vol. Of The Hahnemannian Advocate Monthly Magazine (Dec.-Jan.), 1898, p.557

A young man of about twenty, was seized with a severe chill, followed by pain in right side, and a distressing cough.

I was called on the second day of the attack and found a temperature of 103.6 (39,8 °C)

Jan. 12. Found patient had passed a restless night. No improvement; eyes red and watery, sweating a good deal, can't lie on painful side.

I thought of Belladonna, but had never given it in pneumonia, so resolved to read it up carefully before changing remedy, so gave Sac. lac. In evening, same day, I found same while temperature registered 104.2 (40 °C). I then unhesitatingly gave Belladonna 40M.

The guiding symptoms leading to this were the red face and eyes, sweating, thirst, and pain worse lying on the painful side, also the disease attacking the right side.

The effect of this prescription was wonderful, as the report in the morning showed when I called.

Found the patient had spent a good night, sleeping two hours at a time; temperature was reduced to 101.6 (38,7°C); eyes better, and cough not too severe or bloody and less pain. I pronounced the patient practically out of the woods and the subsequent history proved this prognosis correct. Sac. lac. was given and the next day the temperature fell to 99.6 (37,2°C) . Patient could lay on right side for the first time and cough less. Two days later the patient was sitting up in bed dressed and no fever.

Recover, rapid, bounding pulse, constant cough with blood-streaked sputa. A pain in right side extend to arm-pit. Found congestion in right lung in lower and middle lobes. I gave Acon 50M three doses, and then Sac. lac. In the evening I changed to Ver. Vir 50M which seemed to be indicated, as Aconite had failed to relieve.

Symptoms as reported in the case

Severe chill

Pain in the right side

Pain worse lying on the painful side

Distressing cough

Eyes red and watery

Profuse Sweating

Red face and eyes

Increased thirst

Pneumonia attacking the right side

Fever of 103.6 (39,8 °C)

Rapid, bounding pulse

Constant cough with blood-streaked sputum

Pain in the right side extending to arm-pit

Congestion in right lung in lower and middle lobes

Step 3

Go to the tab “My cases”

The screenshot shows the Vithoulkas Compass software interface. At the top, there is a navigation bar with tabs: "My Compass", "My Cases", "Materia Medica", "Repertory", and "ProSearch". A green arrow points to the "My Cases" tab, which is also circled in blue. Below the navigation bar, the "My Compass" section is visible. It contains a "Communication" section with a message: "You have no new personal messages" and "105 unread cases in your Inbox". Below that is a "Homeopathy news from around the web" section with a list of recent articles:

- Apr 28, 2020 Ayurveda and yoga could provide an effective, affordable means for COVID-19 prevention
- Apr 21, 2020 April 2020 NASH News
- Apr 21, 2020 Interesting statistics.....
- Apr 20, 2020 Leading Australian lawyer on NHMRC Homeopathy Review
- Apr 15, 2020 RESEARCH UPDATES - HOMEOPATHY VOLUME 9, ISSUE 1

Step 5

Go to the tab “Templates”

The screenshot shows the VithoukasCompass software interface. The top navigation bar includes the logo, the text 'VithoukasCompass', and several tabs: 'My Compass', 'My Cases', 'Materia Medica', 'Repertory', 'ProSearch', and a user profile 'eirini.m'. Below this, a breadcrumb trail reads 'Main > Hahnemannian Advocate Case(Pneumonia), 20 y.o.'. The main workspace is divided into two panels. The left panel, titled 'Case History', contains a list of consultations with a green plus icon for 'New Consultation (First Visit)' and an orange circle for 'Acute Pathology (VC~~Acute~~)'. The right panel, titled 'Case Notes', has a toolbar with various icons. The 'Templates' button, which has a checkmark icon, is circled in blue. A large green arrow points down from the top of the screen to this circled button. In the top right corner of the Case Notes panel, there are 'Export' and 'Close Case' buttons.

Step 6

Select “LMHI COVID-19 Clinical Case Report Submission Form”

The screenshot shows the Vithoulkas Compass software interface. At the top, there is a navigation bar with tabs: "My Compass", "My Cases", "Materia Medica", "Repertory", and "ProSearch". The "My Cases" tab is selected. Below the navigation bar, there is a header area with the text "Advocate Case(Pneumonia), 20 y.o." and an "Export" button. The main area is divided into two sections. On the left, there is a sidebar with a "First Visit" button and a "VC Acute Pathology (VC Acute)" button. On the right, there is a "Case Notes" section with a text area and a "Templates" dropdown menu. The "Templates" dropdown menu is open, showing a list of templates. A green arrow points to the "LMHI COVID-19 Clinical Case Report Submission Form" option, which is also circled in blue. Other templates visible in the list include "My Template", "My general template", "Add Template", "System Templates", "LMHI 2020 Clinical Case Report Submission Form", "General VC Template", "Arthritis", "Asthma", "Babies", "Children", "Colitis (Spastic/Ulcerative)", and "Colitis (Spastic/Ulcerative)".

VithoulkasCompass

H O M E O P A T H Y S O F T W A R E

Step 7

Fill in the details of your case (submission form and repertorisation)

The screenshot displays the Vithoulkas Compass software interface. The top menu bar includes 'Solve', 'Differential Analysis', 'Flat Repertorisation', and 'Synapse'. The 'Case Notes' section is highlighted with a blue circle and contains the following content:

1. Title
Include the words "case report" in the title. Describe what is of greatest interest to you as the author. This could be the presentation, the diagnosis, a test result, the intervention, or the outcome.

A pneumonia case report

2. Key Words
Provide 2 to 5 key words that identify areas covered in this case report that will help readers locate this case report.

Pneumonia, Belladonna, Veratrum Viride

3. Introduction
Briefly summarize the background and context of this case report. Include how it contributes to the homeopathic literature.

4. Patient Information and Presenting Concerns

The 'Repertory' section on the right shows a list of symptoms with a search filter and a 'Search' button. The list includes:

- MIND »
- VERTIGO (314) » (See: MIND - DELUSIONS, hallucinations, illusions - floating in air)
- HEAD »
- EYE »
- VISION »
- EAR »
- HEARING »
- NOSE »
- FACE »
- MOUTH »
- TEETH »
- THROAT »
- EXTERNAL THROAT »
- STOMACH »
- ABDOMEN »

An 'Activate Windows' watermark is visible in the bottom right corner.

75TH LMHI CONGRESS 2020

LMHI COVID-19 Clinical Case Report Submission Form

Whilst we should not claim that homeopathy cures COVID-19 infections, the collection of high quality case reports is more important than ever to aid the LMHI in its efforts to develop a strategy for spreading information about the possible role of homeopathy in this crisis. An expert group has been formed to work on this.
